

ITS Civil Engineer

C2S Engineering, LLC Coral Springs Florida, USA

Benefits that are offered are Dental, Life, Medical and Vision

Full Time Employment

We are seeking an ITS Engineer for South Florida. This Engineer will be responsible for the firm's Express lanes with a concentration on TSM&O, ITS, tolling and freeway operations. Responsibilities will include, project management, marketing, pursuit of new work/projects, and recruitment of new employees when needed for specific contracts. The Engineer will primarily work out of the C2S Engineering main office in Coral Springs, FL, and will be required to travel occasionally based on the client needs. There are many benefits available by working in our low stress environment.

REQUIRED QUALIFICATIONS:

- * Current and active Florida Professional Engineering (P.E.) license
- * Good interpersonal skills
- * Proficient data entry skills
- * Ability to work in a team environment
- * Ability to multi-task
- * Ability to communicate clearly and write reports independently
- * Skilled in the use of Windows® based applications; preferred Internet Explorer, Word, Excel, Microsoft Visio, PowerPoint, and One Note
- * Knowledge of the freeway and express lanes systems throughout the State of Florida
- * Basic knowledge of Florida freeway operations software SunGuide®. (Or equivalent software)
- * Basic knowledge of SunPass® tolling systems (or equivalent systems)
- * Basic knowledge of Systems Engineering

Position Requirements

College Degree with minimum Bachelor of Science in Engineering from an accredited college or university. Must have an active Florida P.E. license with a minimum 5 years' experience post P.E. Must have at least 5 years' experience in the field of Intelligent Transportations Systems

(ITS) showing increased levels of responsibilities throughout career. Must be able to obtain approved security clearance for use of the Statewide Law Enforcement Radio System (SLERS).

About C2S Engineering, LLC:

C2S Engineering is an Intelligent Transportation System and Traffic Signal Engineering consulting firm. We employ civil engineers, electrical engineers, and computer/software engineers as well as traffic and IT operations staff. We specialize in planning and operations, Intelligent Transportation Systems (ITS), Transportation Management Centers (TMC), Incident Management, Arterial/Freeway Advanced Traffic Management Systems (ATMS), including Adaptive Signal Control Technologies (ASCT) and strategies for Transportation System Management and Operations (TSM&O). We also provide a quiet, low stress office in Coral Springs.
