

Advertisement for Position 55010070- Drainage Design Engineer - PE III

The Florida Department of Transportation (FDOT) has an excellent employment opportunity in the Central Roadway Design Office. Please share the advertisement below with your friends, co-workers, associates, and current or former employees who might be interested in this opportunity. Please note that we are accepting applications until June 5, 2019.

FDOT Central Roadway Design Office is seeking a highly motivated professional engineer to support all areas of the Drainage Section. Duties include (1) research, development, and codification of statewide drainage policy in the Drainage Manual, Drainage Handbooks, Standards, and Specifications, and (2) close collaboration with DOT districts to support the implementation of design policy within the work program. The candidate will be delivering hydraulics training and work closely in support of the policy development of other disciplines – Structures, Materials, Construction, Maintenance, and others. The candidate will also be working with DEP and the Water Management Districts to develop innovative stormwater BMPs. This position requires the passion and ability to investigate, sort out, and pioneer innovative solutions to challenging problems, working cooperatively with diverse groups of people.

The FDOT offers a friendly, supportive work environment with strong leadership, opportunities to be involved in some of the most important aspects of hydraulics design, and excellent benefits.

You may apply for position number 55010070 at the [MyFlorida, People First website](#).
