

TRANSPORTATION ENGINEERS

ICON Consultant Group is a Florida Transportation Engineering Firm with offices in Tampa and Orlando. We are a growing and passionate group having a working relationship with the Florida Department of Transportation, Local Municipalities, State Universities, Land Development Companies, and other Engineering and Construction Companies.

For our Tampa and Orlando offices, ICON is seeking Transportation Engineers who have a strong interest in developing alternative innovative solutions to the challenging transportation demands in Florida. ICON has Safety and Operations contracts, as well as design contracts involving Diverging Diamond Interchanges, roundabouts, and traditional projects, with FDOT offices and local governments throughout Florida.

Project tasks include:

- Design policy development
- Alternative interchange and intersection innovative concepts development
- Traffic Engineering Studies in West and Central Florida
- Complete Street Studies and Concepts
- Safety evaluations to address pedestrians, bikes, transit and vehicles
- Traffic Signals and Lighting Design
- Roadway Concept Development

What we look for in candidates: Good communication and organizational skills, ability to create a positive working environment, and proven experience with critical thinking.

Engineers: Candidates must have obtained the Engineer Intern (EI) Certificate. Related experience is preferred.

Senior Engineers: Candidates must have their PE license with 5+ years of experience.
